```
Time Warp – Meatloaf
                                     [Intro] A strum Pm
Α
                                                        G
                                                                D
                                                                       Α
                                        Bm
It's astounding
                                Time is fleeting
                                                        Madness takes its toll
But listen closely
                         Not for very much longer
                                                        I've got to keep control
                         doing the time warp
                                                        Drinking... those moments when...
I remember
                               And the void would be calling
The blackness would hit me
[Chorus]
      F C
                      D
      Let's do the time warp again
                                     x2
Bridge
      N.C.
                                     Ε
      It's just a jump to the left
                                            And then a step to the right
      N.C.
                                     Ε
      Put your hands on your hips
                                           You bring your knees in tight
                       D
      But it's the pelvic thrust
                                            It really drives you insane
      [Chorus again]
                                                        G
Α
                                        Bm
                                                                D
                                                                       Α
                           Oh fantasy free me, so you can't see me, no not at all
It's so dreamy
In another dimension, with voyeuristic intention,
                                                   well secluded, I see all
With a bit of the mind flip, you're in the time slip And nothing can ever be the same
You're a spaced out sensation, like you're under sedation
[Chorus]
Α
Well I was walking down the street just a-having a think
When a snake of a guy gave me an evil wink
He shook-a me up and took me by surprise
     Α
He had a pickup truck and those devil's eyes
He stared at me and I felt the change
Time meant nothing, never would again
[Chorus]
Bridge
[Chorus]
            Outro... like record coming to a stop
```
